MALE CUSTOMIZED HORMONE REPLACEMENT THERAPY EVALUATION

Suggested Lab Work for Men

Blood or saliva levels of hormones can be helpful in evaluating your replacement needs. We suggest that you have your physician get a base-line level of your hormones before starting human bio-identical hormone replacement. Although it is not absolutely necessary to have this information for your physician and the pharmacist to complete your evaluation, it is often helpful. The lab tests may consist of drawing up to 8 vials of blood, and may be expensive if you do not have insurance. There are also saliva labs that may be drawn, but may not be covered by your insurance. You may want to discuss this with your physician prior to starting your therapy. The suggested ICD-10 may be any of the following: E34.9 – Endocrine disorder, unspecified; E29.1 – Testicular hypofunction; N52.9 – Male erectile dysfunction, unspecified; E27.8 – Other specified disorders of the adrenal gland.

The following labs are what we suggest you have drawn. If not all are affordable, please let us know and we will suggest which labs would be best to draw based on your completed evaluation.

Prescribers Name	r	Phone:						
Address:	City:	State:	Zip:					
For:		Dat	e:					
Address:								
R	Laborator	y Blood Tes	sts					
	Estradiol	ol DHEA-sulfate						
	Estrone	Cortisol						
	Progesterone	25 hydro	xy vitamin D					
	Testosterone (total)	PSA	•					
	Testosterone (free)	LH						
	Dihydrotestosterone							
REFILL	Sex Hormone Binding	Globulin						
DIAG. or ICD-9		The same of the sa						
DEA NO.	Signature:							

Additional Labs:

These labs should be drawn in the morning between 7:00-9:00, fasting, before taking your morning medications and supplements.

Your physician may also want to draw thyroid labs. Suggested ICD-10 E03.8 – Other specified hypothyroidism. If they do, we suggest the following complete panel: TSH, T3 Total, T3 Free, T4 Total, T4 Free, Reverse T3, thyroglobulin, thyroglobulin antibody, thyroid peroxidase antibody, ferritin and serum serotonin.

Consider fasting insulin, glucose, hemoglobin A1C, and C-peptide labs if you suspect Metabolic Syndrome or other blood sugar imbalances. Other cardiovascular labs such as a cholesterol panel, C-reactive protein, homocysteine and Lipoprotein (a) may also be helpful. Suggested ICD10 – E78.2 Mixed hyperlipidemia

CONSULTANT PHARMACIST AGREEMENT

for

New Patients Starting Customized Hormone Replacement Therapy

Buderer Drug offers an ongoing consultation service for patients who are receiving customized hormone replacement therapy. A one-time consulting fee of \$65.00 will be charged to you when you start customized hormone replacement therapy. This fee covers all services you receive with our expert pharmacists, including: initial work-up, consultations with you and your physician, continuing follow-up of your progress, and future therapy modification consultations with your physician. This one-time fee is all you'll pay so long as Buderer Drug maintains your hormone replacement prescription. We will provide you with a medical receipt for insurance purposes. Please be advised that your insurance may or may not pay for some or all of your prescription and consultation. Any charges not covered by your insurance will be your responsibility. We look forward to serving and caring for you.

Natural Hormone Replacement Confidential Evaluation

From a clinical management point of view, it is very useful to gain a detailed history of possible hormone deficiencies. The answers provided to questions in this form will allow us to maintain your medical history and will help in advising about current medical therapies. All information provided will be kept confidential. The pharmacist will evaluate this form. When complete, please give the form, as well as any lab work to the pharmacist or the physician or nurse practitioner and have it faxed to the pharmacy. Please call the pharmacy to schedule a phone or face-to-face appointment.

TEMPERATURE LOG

ENTER DATE >				
TAKE YOUR	LOCATION	ON	ON	ON
TEMPERATURES	TO TAKE	FIRST	SECOND	THIRD
AT:	AT:	DAY	DAY	DAY
1. Awaking (within 10 minutes)	Under Tongue			
2. Mid-day	Under Tongue			
3. Evening	Under Tongue			
4. Bedtime	Under Tongue			

This log will help determine your basal temperature and your average daily temperature. Since we want to do the best job possible in optimizing our health recommendations for you, it is important that you obtain the most accurate temperature readings possible by carefully following the temperature-taking procedure outlined below:

PROCEDURE:

- 1. Use any thermometer available but note the type used. Be sure to "sling" the mercury down to 96° F. prior to using the old type thermometers.
- 2. Sling the mercury down each night before going to bed, if you have this kind.
- 3. In the morning, as soon as you wake up, put the thermometer under your tongue, then record the temperature in the proper space on the chart. Do this before you get out of bed, have anything to eat, drink, or engage in any activity.
- 4. Take the next 3 temperatures during the day.
- 5. Record the temperatures on lines 1 through 4 of the Temperature Log chart provided above.
 - □ Be sure to record the exact temperature, including the tenth of a degree even if it is an even number.
 - □ Example: 97.2°, 98.0°, etc.

What type of thermometer did you use?
